

Stel 80 Certified Casing

80 C

LAKESIDE STEEL MANUFACTURES OIL WELL CASING TO API 5CT SPECIFICATIONS (API Q1 LICENSED) IN OUTSIDE DIAMETERS RANGING FROM 4.500" TO 8.625". PROPRIETARY GRADE STEL 80 C, IN THE "AS WELDED" CONDITION, IS DESIGNED FOR APPLICATIONS WHERE HIGHER INTERNAL STRENGTH IS REQUIRED.

Lakeside's 80 C Casing has been designed by Lakeside to meet a higher minimum yield strength of 80,000 PSI

Lakeside's 80 C Casing is an "off-the-mill" product with improved mechanical properties – 80,000 PSI minimum yield strength – attained through use of a proprietary steel grade

Our customers can substitute 80 C Casing in place of heat treated products

Increased yield strength – a viable substitute for heat treated products – better value for our customers
